*The Happy series plays with the reflective and malleable qualities of glass. This line consists of heavy thick-walled pieces, which are hand manipulated to create a creased and singularly individual form for each piece. The works are either blown in solid clear crystal or use the Italian technique of 'sommerso' or encased color. The Happy pendants take advantage of the thickness and brilliance of our crystal to create a light with unending refractions. Hand blown and shaped in lead free crystal. No molds are used, and each glass shape is unique. Designed and made by Siemon & Salazar in California. Signed.*

\* Each piece of hand-blown glass is a unique work of art. Dimensions, weight, and color will vary. When multiple fixtures are installed next to each other, expect some variation in shape and color.

\*\* Alternate voltages and socket types are available upon request.
