* Each piece of hand-blown glass is a unique work of art. Dimensions, weight, and color will vary. When multiple fixtures are installed next to each other, expect some variation in shape and color.

** Alternate voltages and socket types are available upon request.

The Barnacle series revels in the material and the way the thick crystal forms and light play with each other. The unique light refractions will animate any surface nearby. Extremely hot molten glass is manipulated by hand to create the ridges, valleys, and undulations. Hand blown and shaped in lead free crystal. No molds are used, and each glass shape is unique. Designed and made by Siemon & Salazar in California. Signed.
