*Quenching a piece of molten crystal by submerging it in water creates an effect that looks like something only nature could produce. The cracked outer layer emits a unique pattern of refracted light from each new piece without compromising the integrity of the glass. The scale of the Lucci pendant makes it well-suited for a cluster or a stand-alone piece.*

**MATERIAL & FINISH OPTIONS**

Lucci pendant part # S06-7344-

<b>Glass Finish</b> clear (GL-048)	048
